

Inventory Financing

With inventory financing, you can borrow against your existing inventory and qualify for financing. The inventory is used as collateral, so you can be approved even if you have challenged credit. Your approval amount is typically equivalent to 50% of your existing inventory, and loan amounts start as low as \$150,000.

This type of financing is perfect for business owners who have a large inventory and are looking for funding for their business, even when you have personal credit challenges.

Approval Amount	\$150,000- \$10 million
Credit Quality	Bad Credit Accepted
Collateral	Inventory
Financials	None Required
